

Safety Features of the Hotel

WATER

The Hotel has a total combined water storage capacity of 800 cubic meters of water, constantly refreshed and supplied by the city main system. The water is internally stored in compartmentalized and reinforced sanitary reservoirs well within the secured perimeter and control of the Hotel. Although water is certified potable the Hotel has installed as a redundancy, a series of ultra-violet light treatments to handle even the remote possibility of even the briefest slippage in supply standards.

FOOD

Shangri-La Hotel, Baotou at all times maintains a high standard for food hygiene and sanitation. In the unlikely event of food supply disruptions, the Hotel has enough fresh food and dry goods stocked to feed peoples for 3 meals for several days.

FUEL AND POWER

The Hotel has a dual source electrical supply system, which ensures that power supply to the Hotel can be maintained even if a malfunction should occur to one of the power supply lines. Even if both power supply lines fail, we still have a diesel engine driven emergency generator of 1362.5KVA. The generator can provide power for all essential lighting, fire detection and public announcement systems, life safety systems and security systems as well as guest elevators for evacuation.

FIRE AND LIFE SAFETY

All guestrooms are equipped With Smoke detectors and sprinklers, regularly maintained by a certified fire systems engineering company. These safety facilities inside guestrooms are directly connected to the addressable fire alarm control panel at the 24-hour Fire Command Centre. The hotel employs a full time Life Safety Manager dedicated to ensure the proper operation and maintenance of the fire safety equipment. The manager also conducts regular fire safety training to our staff.

SECURITY

The Security Management Team is a seasoned group of security veterans with law enforcement experience as well as strong hospitality security experience. All these efforts are monitored controlled and dispatched from a central security command post staffed and active twenty-four hours a day. From the same command post, staff is tasked to constantly monitor strategically located electronic surveillance from cameras located throughout the facility. Backing up these monitors is round-the-clock surveillance that includes recording systems. These records are kept to assist with maintaining the integrity of the security systems as well as offer assistance to support any investigations that may be required.

GUEST SAFETY AND SECURITY

Shangri-La Hotels and Resorts would like to assure every in house guest of our commitment to their personal safety and security.
