

Greener Choice : China World Hotel, Beijing's Carbon-less Meeting Programme

Why choose a carbon-less meeting?

By choosing our carbon-less meeting package, you help reduce CO2 emissions by more than 1,000 kilograms over a three-day meeting for 30 people, the same quantity that normally takes about 60 trees to absorb in a year.

By having a carbon-less meeting, you are contributing to the sustainable community because 2% of the revenue from these meetings will be placed in a green fund to support eco-friendly projects in Beijing.

The Carbon-less Meeting Programme includes:

- Green meeting room setting
- Coffee breaks and buffet with local features
- Set lunch made with locally sourced ingredients
- Mint-leaf-essence water served from pitchers (in place of individual plastic bottles and polo mints).
- Adaptors and Power Point access for all attendees
- Pencils and loose sheets of paper set aside on a separate table
- WI-FI Internet access
- Use of LCD projector and whiteboard with markers
- Sound system with rostrum-cum-microphone plus additional microphones
- Interactions with students from Hua Ao School, a civilian-run institution providing education for migrant workers' children
- Usage of the exercise bicycle in the meeting room
