embrace Gift of Life

Shangri-La's **Care for People Project**

Since 1985, Shangri-La Kuala Lumpur's "Embrace the Gift of Life" charity project has touched the hearts of many - raising more than RM6 million to support hundreds of critically ill children suffering from severe heart conditions and other heart-related medical challenges. This enduring initiative continues to shine each festive season through the generosity and compassion of our patrons.

This year, we invite you to share in the spirit of giving by sponsoring one or more of our **A Symphony of Hope** Ornaments, available for a minimum donation of RM1,100 each. Your contribution will help fund vital heart surgeries and essential medical care for children in need as well as support vulnerable children - bringing hope and healing where it matters most.

The 2026 display features **"A Symphony of Hope"** ornament collection - six exquisite, handcrafted designs created by our talented pastry team led by award-winning Pastry Artist Wayne Siow. Each vibrant sugar-paste figurine has been lovingly sculpted and arranged on a 10-tier conical steel structure, forming an enchanting rotating Christmas tree that offers a captivating 360-degree view of the ornaments to be unveiled at the Lobby of Shangri-La Kuala Lumpur from 19 November onwards.

As a token of appreciation, the name or company logo of each donor will be beautifully displayed alongside the sponsored ornament - a heartfelt acknowledgment of your kindness and support.

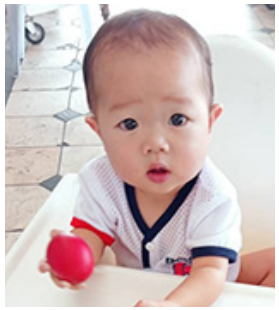

Join us in celebrating the true meaning of Christmas - to give, to care, and to share the gift of life.

There are also five exclusive limited edition designs for donors to sponsor at RM5,000 each.

Three-month-old, Muhammad Adrean has been diagnosed with a Ventricular Septal Defect (VSD). He requires a VSD closure to correct a hole in the heart. The defect if not closed will eventually result in irreversible damage to the lungs significantly impacting his quality of life and life expectancy. The estimate cost for the surgery is RM 60,000.

Two-year-old, Sim Tian Yu has been diagnosed with Double Outlet Right Ventricle (DORV) and Transposition of the Great Arteries (TGA), congenital heart conditions that affect normal blood flow between the heart, lungs and body.
He requires two procedures: Pulmonary Artery Banding to reduce excessive blood flow to the lungs, and an Atrial Septectomy to enlarge the opening between the heart's upper chambers. These procedures will help protect his lungs and stabilise his condition in preparation for further corrective treatment. The estimated cost of the surgery is RM80,000.

Four-month-old, Nor Sofea has been diagnosed with a Ventricular Septal Defect (VSD). She requires a VSD closure to correct a hole in the heart. The defect if not closed will eventually result in irreversible damage to the lungs, significantly impacting her quality of life and life expectancy. The estimate cost for the surgery is RM60,000.

Two-year-old Faliq Aydeen Bin Abdul Shahin has been diagnosed with Tetralogy of Fallot with Pulmonary Stenosis, a congenital heart condition that affects blood flow from the heart to the lungs. He requires Main Pulmonary Artery (MPA) Augmentation and closure of the residual Ventricular Septal Defect (VSD) to improve blood flow and address the remaining hole in his heart. The estimated cost of the surgery is RM65,000.

Ten-year-old Dinish A/L N. Vigneswaran has been diagnosed with Tetralogy of Fallot with Pulmonary Stenosis, a congenital heart condition that affects the normal flow of blood from the heart to the lungs. He requires Pulmonary Valve Replacement and Aortic Valve Repair to address his heart condition. The estimated cost of the surgery is RM90,000.
